

MAISONS
DU MONDE

New 2019 Junior collections

A deserving member of the great Maisons du Monde family, this year again our brand-new Junior catalogue gives pride of place to diversity and trends. Our stylists have designed universes filled with fantasy to stylishly furnish the rooms of children.

For babies, the super soft materials from the **Bulle** collection, or powder pinks and light, natural wood from the **Lou** collection are sure to please. And kids' rooms are transformed, ready for intergalactic conquest with the **Galaxy** collection, a call to the open seas with the **Marin** collection, or a discovery of dinosaurs with the **Dino** collection... And we haven't forgotten the little princesses, with the **Mila** collection dedicated to modern ballerinas... And sure favourites are our raised and multi-functional **Dreams** bed and **Nuage** convertible cot.

And we have gone even further because, for the first time, we have created an **outdoor range for our very youngest customers!** Teens are sure to be won over by the beautiful **Sunset** collection, or the Rock spirit of the **Rebel** Collection!

And, since it is our duty to meet even higher standards for children, **77% of the wood furniture is FSC®** certified, which guarantees that the wood used comes from responsibly managed forests. In an effort to continually evolve, we also offer cotton products which contribute to our eco-friendly ethos as the cotton flowers are cultivated using the principles of **organic agriculture**. With more than **500 new products** and original universes for our new Junior collection, children can continue to dream.

Just think of everything they will be able to imagine!
